1 Introduction

In this era of information technology, information has become the most valuable resource of the world. That's why, information security and ethics has been viewed as one of the foremost areas of concern. It also creates academic researchers and practitioners. Information security and ethics is defined as an all encompassing term that refers to all activities needed to secure information and systems that support it in order to facilitate its ethical use.

2 Objectives

A principle which is a core requirement of information security for the safe utilization, flow, and storage of information is the CIA triad. CIA stands for confidentiality, integrity, and availability and these are the three main objectives of information security. In this project, we want to cover the following facts from one or more organizations

- ❖ Necessity of information for any organization
- ❖ Area of customers' information the organizations consume
- ❖ Information system management
- ❖ Provided Information security
- ❖ Availability of customers' information
- ❖ Usability of customers' information

3 Scope

The area of collecting information of ethical issues for customers' information of organizations will be some well-known organizations within the Dhaka city.

4 Methodology

To have successful project we will contact with a few organizations. To have the information of their ethical issues of their customers' information we will conduct a few meetings with the employees and managerial officers. We will collect necessary information those are required for our project if it fulfill the organizations' policies.
